ASSIGNMENT

Q1. What is a computer?

Ans. Computer is an electronic device which takes the input, processes it and generates the output. Computer understands only binary language which is in the form of 0s and 1s.

Q2. What is RAM?

Ans. RAM stands for Random Access Memory. It is the memory which lies between HDD and CPU. RAM is volatile in nature. The size of RAM is compact.

Q.3 Where is data stored in a computer?

Ans. There are various storage media where the data is stored in a computer such as RAM- It is the memory which lies between HDD and CPU ,HDD-It is the memory which is non-volatile in nature but their speed is relatively slow ,SDD- These are the enhanced version of HDD but are fast as compared to that of them and Cache-In this type of memory the frequently asked instructions are stored.

Q.4 What is that input device used to type text and numbers on a document in the computer system?

Ans. Keyboard

Q.5 What are the output devices?

Ans. The devices which generates some form of output in response to the input given to the computer system are known as output devices.

Ex.Monitor ,Printer, Speakers, etc.

Q.6 Which is the input device that allows a user to move the cursor or pointer on the screen?

Ans. Mouse

Q.7 Which language is directly understood by the computer without a translation program?

Ans. Machine Language which is in the form of 0s and 1s.

Q.8 What are Input devices?

Ans. Input devices are the devices which are used to receive the commands.

Ex. Keyboard, Mouse, etc.
